## Activities **Department of Chemistry**

2016-17

A one day workshop was conducted on 26<sup>th</sup> August, 2016 titled, "Microscale Analytical Techniques". The workshop was named 'Drop Magix' and that came a big day which brought wonders of chemistry in a more exciting way. Dr. S. Murugan, former Head, Department of Chemistry, S.T. Hindu College, Nagarkovil had inaugurated the workshop. The potential benefits of microscale analysis offers are; it offers safety to students, it needs small quantities of chemicals and simple equipments, and reducing cost. The main advantage of microscale analysis is that it can be done outside of the laboratory. There were two academic sessions that deals with the topic 'Organic mixture analysis' and 'Inorganic mixture analysis'. The sessions were much interesting and interactive.

Dr. Sujith K.V., Assistant Professor, P.G. Department of Chemistry, Payyannur College had inaugurated our association on 13<sup>th</sup> February, 2017. There was a seminar session on the topic "WEEE" (electronic waste). He emphasized on the dumping of various solid wastes and the health problems we may face in future. All the Chemistry students participated in the seminar.

Dr. Byju K.V., Assistant Professor, SAT Campus, Kannur University had delivered a talk on "Green Chemistry for Environmental Sustainability" on 1<sup>st</sup> March, 2017 as part of the institute seminar series, *Convergence 16-17*.
